Hello,
Attached is a template we need to complete as part of the appropriation obligation tied to the Admin account (4510-0100). We need to provide data on the **types and #s of tests performed in FY06, 07, 08 and 09** to date. I will take responsibility for putting the information from each area into a single document. We should plan on having the data collected by **April 28th** so that any issues can be addressed in a timely manner. If you'd like to meet about this and discuss please let me know and we can ask Austin to set up a meeting. Thanks.

Grace

Importance: High

Here is the electronic copy of the spreadsheet to be filled out. As Carol mentioned in the meeting please keep it as simple as you can. Please return completed information to me by 5/1/09.

If you have questions, please let me know

Thank you

Kato

This is just a follow up to what Carol mentioned at the Admin meeting last week that there shall be an assignment related to the DPH Insurance project required by line item language for the DPH Admin account 4510-0100. As part of this project DPH is required to provide an assessment of the utilization of the public health programs since 2006 for the programs listed below (see attached, part b). Further details on how to proceed with this assignment will be discussed at the next 9:30AM Admin meeting on 4/15/09.

1. Early Intervention Services
2. State laboratory testing services;
3. Communicable disease testing services;
4. HIV and AIDS-related services;
5. Substance abuse treatment services;
6. Family planning services;
7. Immunizations, and
8. Disease prevention and management services.

Project Update:

UMMS has completed the initial phase of this project (overview meetings) and these meetings went well. They have a better understanding of the services provided, service delivery, funding sources, participants and insurance coverage etc for the various programs they had meetings with. They also gathered some information regarding the impacts of Health Care Reform but that for the most part this information was limited and varied from program to program. Within the next couple of weeks UMMS will be meeting with Carol and Monica to provide a status report on the part of the project they are working on and to get feedback and guidance on how to proceed with this study.

Thank you

Kato
